#exit #lesson mood: anxious trade: XAUUSD short +1.76R

#sleep #lesson mood: tired

Slept five hours and traded anyway. Reaction time was visibly off on the tape. One scratch trade and I shut it down. Lesson logged: sleep is part of the edge, not overhead.

Weekly review — the hour bucket is real

#review #analytics #lesson mood: calm

Pulled the analytics: my winners cluster in the first two hours and my losers cluster after lunch. Going forward the plan only allows new risk before 11:30. The data is the coach.
